Agricultural Buildings

Thick White
Woven Facer

White Woven
Facer Detail

Reflective Facer
to Increase R-Value

Why poly shield® XR?

- Expanded polystyrene (EPS) insulation core with white woven facer on one side and reflective facer on the other
- White woven facer exposed on the inside of building is durable and washable; no additional interior protective layer required
- High R-value, rigid insulation saves energy costs and brightens building interior
- Available in 4x8, 4x9, and 4x10 foot sheets, ½ to 6 inches thick
- Not for commercial or residential use
